PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/562,255	Applicant(s) YURATICH, MICHAEL ANDREW	
	Examiner GIOVANNA C. WRIGHT	Art Unit 3672	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 February 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,4-9 and 33-43 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,4-9,33 and 34 is/are rejected.
- 7) ☒ Claim(s) 35-43 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 12 April 2007 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1,4-9 and 33-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buchanan et al. 20020066568 in view of Eno 5923111.

Referring to claims 1,4, 7-8 and 33-34, Buchanan discloses a method of pumping wellbore liquid comprising installing an electrical submersible centrifugal pump (see fig. 1, at 10) in a wellbore having a AC synchronous permanent magnet motor (90, paragraph 0054). Buchanan does not disclose operating the pump at 7000-7500 rpm. Eno teaches that permanent magnet motors can operation efficiently at higher rpms which allows smaller pump to be manufactured to be installed in a well (col. 1, lines 25-35). As it would be advantageous to save money on material by manufacturing a smaller pump, it would be obvious to one of ordinary skill in the art at the time of the invention to modify the method disclosed by Buchanan to operate the pump at 7000 – 7500 rpm in view of the teachings of Eno.

Referring to claim 5, Buchanan discloses recovering the liquid to the surface (see fig. 1, at arrow pointing to the left).

Referring to claim 6, Buchanan discloses transporting the liquid from a first location (see arrows at 14) to a second subterranean location (see arrow at 34).

Referring to claim 9, Buchanan discloses the pump is operative to draw wellbore liquid from a plurality of lateral wellbores in to a central pump (fig. 9b, paragraph 0048).

Allowable Subject Matter

Claims 35-43 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 2/1/08 have been fully considered but they are not persuasive. The applicant argues that the Buchanan reference has no need to run a motor at a higher speed because it can increase power by increasing the stages. However, this is just one way of increasing power. There is no mention in the reference that other means of increasing power cannot be used. The applicant argues that the Eno reference makes no mention of operating synchronous permanent magnet motors at higher speeds. However, the applicant is incorrect. The Eno reference makes note that at higher speeds the induction motors is not efficient and that an alternative to this type of motor is a permanent magnet motor (see col. 1, lines 31-35). Therefore, it would be obvious to run the permanent magnet motor at higher speeds to reduce the number of stages needed or use a smaller pump, it would be obvious to one ordinary skill in the art at the time of the invention to modify the method disclosed by Buchanan

to run the AC synchronous permanent magnet motor at higher speeds in view of the teachings of Eno.

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to GIOVANNA C. WRIGHT whose telephone number is (571)272-7027. The examiner can normally be reached on 7:30-4 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David J. Bagnell can be reached on 571-272-6999. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 3672

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
